LinkedIn | Portfolio | Kanpur, Uttar Pradesh, India

## PROFESSIONAL SUMMARY

Full-Stack Developer with strong expertise in building scalable software systems, AI-powered applications, and developer tools. Strong focus on backend engineering, system design, and production-grade development. Built impactful projects including a custom programming language ecosystem, AI healthcare systems, and computer vision applications with a strong problem-solving mindset and passion for startup-driven innovation.

## EDUCATION

|                                                                        |                      |
|------------------------------------------------------------------------|----------------------|
| <b>Bachelor of Computer Applications</b><br><i>Pursuing Graduation</i> | 2024 – 2027<br>India |
| <b>SR Education Centre</b><br><i>Senior Secondary Education</i>        | Completed<br>India   |

## PROJECTS

|                                                                                                                                                                                                                                                                             |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| <b>FeFe Script Custom Programming Language</b>                                                                                                                                                                                                                              |      |
| <ul style="list-style-type: none"><li>Built a custom programming language with parser architecture, syntax rules, runtime execution, and CLI workflow</li><li>Developed NPM package and dedicated VS Code extension for syntax highlighting and developer tooling</li></ul> |      |
| <b>CodeMesh Developer Productivity Tool Platform</b>                                                                                                                                                                                                                        | 2025 |
| <ul style="list-style-type: none"><li>Built a developer-focused platform for code utilities, workflow automation, and productivity improvement</li><li>Designed scalable architecture for future SaaS expansion into a complete developer ecosystem</li></ul>               |      |
| <b>Mediva An AI Medical Text Extraction + Medicine Report Analyzer System</b>                                                                                                                                                                                               | 2026 |
| <ul style="list-style-type: none"><li>Built OCR + AI-powered healthcare assistant for extracting prescription text and medicine suggestions</li><li>Improved healthcare accessibility by simplifying prescription understanding and medical workflows</li></ul>             |      |
| <b>Vision Recipe AI Smart Camera-Based Recipe Generator</b>                                                                                                                                                                                                                 | 2026 |
| <ul style="list-style-type: none"><li>Built computer vision application for scanning ingredients and generating instant recipe suggestions</li><li>Integrated AI-based ingredient recognition and recommendation system for real-time food assistance</li></ul>             |      |

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, Java, C, C++, Rust, GoLang  
**AI Core:** Scikit-Learn, Supervised and Unsupervised Learning, Deep Learning, Backpropagation, Transformers, NLP, Computer Vision, RAG, LLMs, AI Agents, Agentic Workflows, Langchain, LlamaIndex, Ollama  
**Frontend:** React.js, Next.js, Tailwind CSS, Shadcn UI, Responsive UI Development  
**Backend:** Node.js, Express.js, REST APIs, Fast APIs, Authentication Systems, Server Architecture  
**Database:** MongoDB, PostgreSQL, Pinecone, Database Design, Query Optimization  
**Tools & Platforms:** Git, GitHub, VS Code, Postman, Vercel, Clerk, Stripe, PostHog, NPM, UV, Jupyter, Docker, Kubernetes, Github Actions, Kaggle  
**Core CS:** Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

## ACHIEVEMENTS

Built multiple production-grade software projects with strong emphasis on scalable architecture and real-world problem solving  
Engineered developer tools, AI-powered applications, and custom programming language systems from the ground up  
Strong expertise in backend systems, compilers, AI Applications, and production-level software engineering

## SOFT SKILLS

Problem Solving System Thinking Communication Fast Learning Ownership Mindset Leadership Independent
